Development	HTML, CSS, JavaScript, ReactJS
Tools	Visual Studio Code, MySQL, Git
Coursework	Data Structures and Algorithms, OOP, Operating Systems, DBMS
Other Skills	Problem Solving, Project Management, UI/UX Design

PROJECTS

Prosper Pickup

Developed a web-based platform for booking shared rides and managing package deliveries. Built using HTML, CSS, and PHP, with features like user registration, trip creation, vehicle tracking, and payment management. Designed for responsive use across desktop and mobile devices.

Weather App

Created a responsive web application using the Open WeatherMap API to display real-time weather data. Included city search, dynamic icons, and error handling.

Static Websites

Built multiple static websites using HTML, CSS, and JavaScript. Projects included personal portfolios, business landing pages, and blogs, with a focus on clean design and accessibility.
